Mayor Eugene Gregory also sent word that the citizens of Sacramento would hold a celebration and asked the cooperation of the Board.

A despatch from R Moehle, of Portland, was read, asking for information as to the plans of celebration. A long discussion then ensued and it was resolved that the celebration be held, and that all those who did not desire to go to Portland should go to Sacramento. A general committee of arrangements, consisting of the mayor of San Francisco, with the presidents and secretaries of the various organizations, was then appointed and adjourned till Tuesday evening, at which time the different bodies are expected to be fully represented, and the final reports of the committees will be heard.

Danny Richardson, however, was the man who saved the Giants from possible defeat. His fielding was superb, both of his putouts being extremely difficult running catches, one of which robbed the Pioneers of a run, which would have tied the score, while one of his two two-baggers pushed Danny across the plate with the only run of the game. A Lost Car Found.

A very singular loss and recovery occurred recently on the Union Pacific near Laramie. A special freight, running passenger time, broke in two on the hill, and the front section ran around a sharp curve so fast that it whipped off the rear car, filled with choice Chinese silks, into the gulch, where it disappeared from sight in the heavy brush. The break was so clean that the two sections were coupled together without the single car's absence being noticed. For two months that car lay there while the entire road was being searched high an low for it, and not a soul could guess where it had gone. The other day a cowboy rode into a small station on the line and casually asked when they were going to clear up that wreck down in the gulch. The agent knew of no wreck, and thought the cowboy was fooling with him, but at last, convinced he was in earnest, went with him to the spot where he had indicated the wreck was to be found. There at the bottom of a very deep fill, behind a huge pile of boulders and a mass of sage brush lay the missing car, No. 99. It was resting on its side, and strange enough the trucks were in proper place. The doors were sealed, and there was nothing beyond a few bruises and dents in the roof and sides to show that there had been any rough treatment experienced. The agent thought he was dreaming, but when he found he was wide awake, he lost no time in hurrying home and telegraphing to headquarters. The car was raised and its contents found intact. The admirable weather of the mountain region, the absence of rain and the unfortunate fact that the car was completely hidden from view from the track above, combined to prevent the valuable cargo from the ravages of the elements or of passing tramps, so there was not a dollar's worth of loss to the lot.—[Omaha Republican.

A COLD WAVE IN THE NORTH.

Gladstone Will Visit America in April—Report of the Post-office Department.

[Associated Press Dispatches to the HERALD.

NEW YORK, November 27.—Mayor Hewitt presided at a meeting held in Chickahominy hall to-night, where speeches were made by members of the International Arbitration Deputation from the British Parliament.

While Sir George Campbell, the first speaker, was explaining the object of his journey some one cried, "What about the Alabama?" The question provoked a storm of hisses, but the speaker said, "No better illustration of the value of arbitration could have been adduced than the Alabama episode." He thought that the English all admitted now that their conduct on the occasion was very shabby. Referring to the present discussion regarding the fisheries the speaker mentioned Chamberlain as an honest and satisfactory man, a statement which provoked a storm of mingled hisses and applause.

Henry Stewart, M. P., speaking on the subject of arbitration in the Irish question, said that he believed that if there was a vote to-day the great majority of the English people would declare for home rule.

Resolutions were adopted appointing a committee of five with Mayor Hewitt as chairman to urge on the government to formulate an arbitration treaty with Great Britain and request Congress to take measures to call a convention of the nations of North and South America, and such others as may choose to join, for the purpose of establishing an international court of arbitration.

Germany's Policy on the Samoan Islands.

RIOT AT LIMERICK, IRELAND.

Grevy at Last Submits to the Pressure and will Resign on Thurday.

[Associated Press Dispatches to the HERALD.

SAN FRANCISCO, November 27.—A correspondent writing from Apia, Samoa, under date of November 7th, reports the arrival of the United States warship Adams at the island on October 19th. The correspondent says it was significant to watch the delighted expressions of the Samoans, and hear them say how glad they were that friendly relations were at once established between the Samoan and American officers. Native dances were given in honor of the visitors. The first meeting of the native legislature convened under Tamasese took place on the 12th of October.

THE BEHAVIOR OF THE NATIVES

Did not indicate any departure from their position, as they do not submit to Tamassee, but to the Germans. The proceedings at the Parliament were consistent with the German policy. No one was allowed to discuss the tax of $1 per head, which was announced with fines and imprisonment if not paid in full. Now, to get money to pay this tax the Samoans will have to borrow and mortgage their lands and goods. The Germans know this, and they are threatening the natives

WITH PUNISHMENT

by the man-of-war if they do not mortgage to the German traders. On the day before the assembling of the Legislature, a chief named Tamasen was arrested, charged with theft and put in prison. The real cause of this action was that Tamasen had said that he was glad there was an American man-of-war coming, and this had been reported to the magistrate, who held him up. Tamasen was released from prison by the American Consul-General, who severely rebuked the magistrate.

The crowd stoned and hooted the police who tried to clear the streets with batons and bayonets, but met with great resistance; many civilions and constables were injured. The police acted in a reckless manner. The windows of the hotels on the street were filled with onlookers, who taunted the police. TRIALS OF PHYSICIANS.

A Doctor Talks of the Difficulties Encountered.

"The first five years are the darkest in a young doctor's life," said a well-known physician. "It does not matter how nicely he is getting on, he is sure to have built his expectations too high. A medical man always thinks he is doing better than he is. Leaving the simon pure charity cases out of the question altogether, I have always thought myself lucky if I collected one-half of my accounts. While a reputable doctor looks upon advertising in a general way as something tabooed, many of us, I doubt not, in our young days have resorted to driving rapidly through various streets in the middle of the day. I never knew this little scheme to hang fire, and by the time I got back to the office I frequently found two or three calls on the slate.

"An officious friend of mine," continued the doctor, "once advised me to settle in the country, where the competition wasn't so great. In six months I came near starving to death. The place was so sparsly peopled and the patients so far apart that my time and clothes were worth more than my fees. By selling my library I managed to buy a horse and buggy and go to work on the co-operative plan. I divided the county off into four districts, each of which I visited once a week. My method was to keep a family in thorough repair for a stipulated sum per month. Nearly all the inhabitants became subscribers, and I might have thrived well on my little monopoly if another smart doctor hadn't stepped in and reduced the rate. I returned to the city, there settled down and married, and after having had a couple of well-known men die on my hands I found myself famous and in possession of a lucrative practice.

"No, I don't think there is as much bleeding of patients as is commonly supposed. Of course human nature is the same in a doctor as in any one else. He is always number one, and the patient number two. There are some people whom you have got to keep on the sick list all the time. They would not be happy unless they could tell their friends all about the torpidity of their liver and the unsoundness of their lungs. A doctor must humor such patients, and assure them they are really ill whenever they take a fancy to being so. This is a kind of bleeding that will never stop so long as there are such people in the world. The old doctor I studied under used to tell a good story at his own expense. In his early days of struggle a friend twitted him upon taking so long to cure a patient. 'Why, man,' replied the old doctor, 'I have so few patients that I can't afford to cure any of them.'

"Speaking of quacks," continued the doctor, after a pause, "you would be surprised what a strong hold the empirical fraternity has upon nervous people. They are easily convinced that there is something awful the matter with them. An aggravated case of this kind recently came under my notice. A man, whose business often called him from home for months at a time, rushed wildly into my office one day and begged me to visit his wife. He said that if I couldn't get her out of her megrims he would either have to procure a divorce or commit suicide. It seemed that the woman, during one of her husband's periodical absences, fell into the clutches of a female lecturer, who bled her for all she was worth. When the husband returned he found his wife a shadow of her former self She was melancholy and peevish, and was slowly wearing herself away. The whole house was turned into an apothecary shop, and the woman herself was a walking advertisement of the empirics' wares. At night she made herself hideous by wearing a complexion mask and medicated gloves that made her hands look like sugar-cured hams. There was scarcely an inch of her whole body that was as nature made it. When I examined her she had on a liver pad, two lung pads, a porus plaster for a weak back, another for a weak stomach (for the sake of symmetry, I suppose), belts and bands on arms and legs to prevent varicose veins, night boots to keep the feet warm, and magnetic clothing wherever there was any room for it. The bed itself was fearfully and wonderfully made, with all patent appliances. I felt very sorry for the husband, who seemed to think a great deal of his wife. He was very patient with her, although more than once he confessed it was hard for a man to love, cherish and protect a woman who togged herself out in such a fashion. It was a hard case to treat, but we finally conquered."—[New York Sun.

EASTERN EVENTS.

Prohibition Defeated at Atlanta, Georgia.

1120 MAJORITY CLAIMED.

A Confidence Operator Posing as Mackay's Agent Arrested at Pittsburg.

[Associated Press Dispatches to the HERALD.

ATLANTA, GA., November 27.—After the most hot-headed contest on record in the State of Georgia, Atlanta to-day voted against prohibition. The fight has been a peculiarly bitter one and for over a month the citizens have been engaged in the contest, holding meetings nearly every night. Both sides had full campaign funds and managed their respective courses for all they were worth. The negro vote was the bone of contention and the balance of power, each side making the most strenuous effort to get it. The negros were considerably divided on the subject although the majority of the men voted the anti-prohibition ticket. One feature of the contest was the

ACTIVITY OF THE WOMEN,

And the result of their work was shown to-day by the appearance of many women at the polls with blue badges. They served hot coffee and sandwiches at every polling-place and conducted prayer meetings and singing crusades in the open air. Fulton county, in which Atlanta is located, voted two years ago on the same question, and went for prohibition by a majority of 228. The registration this time exceeded that of last year by 2000 votes.

THE PRINCIPAL FIGHT

Made on prohibition during the campaign was that it did not prohibit, and that intoxicating drinks could be openly purchased in a number of places throughout the city which paid taxes to the United States Government for the sale of whiskey. Thousands of gallons have been sent in each month from the cities around Atlanta.

THE PROHIBITIONISTS CLAIMED

That Atlanta had never had prohibition; that while it was so voted years ago, the licenses then existing did not expire until almost a year ago, and since that time the domestic wine clause in the local option bill allowed many places in the city by which the law could be evaded. This was, however, remedied by the last legislature, which put a license of $10,000 on all the wine rooms after January 1st. The city has gone "wet" by probably a thousand majority, and great enthusiasm prevails on the streets.

LATER OFFICIAL RETURNS

Make the anti-prohibition majority 1120. The Antis carried every one of the six city precincts and all but one of the sixteen precincts in the county. The most intense excitement prevails to-night, and the Antis are jubilant. The Prohibitionists concede the victory.

A SWINDLER'S SCHEME.

He Wanted $500 as Mackay's Agent—Neatly Trapped.

PITTSBURG, November 27.—John W. Armytage, of San Francisco, was arrested to-night while attempting to pass a bogus check for $500. Armytage came here a few days ago with letters from John W. Mackay, which he presented to Black & Baird, real estate dealers, claiming to be Mackay's agent commissioned to purchase for the cable station. This afternoon he came and asked them to cash a check for $500. The check was signed by Mackay and drawn on the Bank of California. Black and Baird telegraphed to Mackay, and an answer was received to-night saying that Armytage is unknown to him. The latter was placed in jail to-night. It is supposed that the letters in his possession are also forgeries. Armytage is twenty-eight years old.

STEAMSHIP SUBSIDIES.

The Pacific Mail's New Contract With the Railroads.

NEW YORK, November 27.—Vice President Lauterback, of the Pacific Mail, to-day confirmed the announcement that at the Chicago meeting of the transcontinental lines a subsidy of $65,000 a month by the overland railways was granted to the steamship companies. He said that it was practicably the best arrangement for the company that has been made since the original subsidy of $19,000 a month. It was much better than the recent subsidy of $85,000, because the contract with the Panama railroad has been modified so that transportation across the isthmus leaves a larger profit. Of course the steamship company will not compete for the higher classes of freight, as in former contracts. The overland railroads guarantee monthly freight and the use of the steamship line for carrying heavy merchandise.

Littlewood Wins the Race.

PHILADELPHIA, November 27.—The 142 hours go-as-you-please race ended to-night. Littlewood, the (Englishman), won, fifty miles ahead of the others, Albert 530 miles, Panchot 511 miles 9 laps. Littlewood abandoned his intention of beating the record of 610 miles.

A Fiend's Work.

WAUSAU, Wis., November 27.—It was discovered this evening that the fire where Homkel and his three children perished yesterday was incendiary in origin.

Three Days Grace.

CHICAGO, November 27.—State Attorney Grinnell and Sheriff Matson agreed this afternoon to postpone the removal of the boodlers to Joliet till Wednesday.

Bank Notes.

WASHINGTON, November 27.—The Comptroller of the Currency to-day authorized the San Bernardino National Bank, of San Bernardino, California, to begin business with a capital of $200,000.

DAILY HERALD.

DROWNED.

A Sad Disaster at Long Beach Yesterday.

Long Beach, yesterday, was startled by a tragic occurrence, of a nature common to a seaside resort, but of which, so far, there have happily been but very few instances at the watering places near Los Angeles. It was the hour of noon, and most of the visitors to the beach had disappeared within the welcoming walls of the neighboring hotels for their midday repast. A few small groups of pleasure-seekers had not yet abandoned the glistening sands, however, and some of them were sporting in the azure waves laughing and carolling as they revelled in the untrammeled enjoyment of their life-giving bath. In one of these bands was to be seen the figure of Willard Smith, a former resident of Chicago, but who had lately established his residence at Pasadena. He was a young man of about twenty years of age, of sickly constitution and fragile in frame, and had wandered down to Long Beach with some friends so that he might indulge in a sea-bath, and breathe the fresh, pure air which comes from over the Western main. He ventured to a distance from shore which his friends thought hazardous, and one of them, swimming out to him, advised him to come back in shallow water. It was lucky that a helping hand arrived when it did, for Smith was almost exhausted from his battle with the waves, and with his hands on his friend's shoulders the two started for the shore. It was but a short distance to where the water was shallow enough to permit of walking, and on reaching this spot Smith released his hold on his friend who started for terra firma under the impression that Smith was following him. On nearing the water's edge he made some jocular remark and receiving no reply, turned round to see the cause of Smith's silence. He was horrified to see that his friend was not with him, and looking back in the direction of the spot where he had left him, he saw a sight which for the moment unnerved him. Far beyond the breakers was visible the head of Smith as he bobbed up and down at the mercy of the waves, and realizing that his friend was drowning, the almost distracted man gave the alarm and rushed to his assistance. An engineer, who was standing by, also went manfully to the rescue, but it was found that it was in vain to attempt to swim beyond the breakers. In the meantime the life-boat was launched and the hotels had emptied their occupants on to the beach, and as the oars flashed in the gleaming spray many a prayer went up that the assistance might not prove too late. But alas! when the life-saving crew arrived at the spot where Smith was last seen fighting for his life, there was no trace of the unfortunate man in the greedy waters which welled and surged with glassy front, hiding the cruel work they had done. To and fro the boatmen went for over an hour, hoping that they might at least rescue the remains, but their search was fruitless and they, perforce, returned to land discouraged with the result of their efforts. The crowd of people did not disperse until darkness shed its concealing mantle around, but up to a late hour last night no trace of the remains had been discovered.

It is understood that he was an agent for the Fairbanks Scale Company, though this report has not been authenticated.

LOS ANGELES VS. POMONA.

A One-Sided Contest at the Base-ball Grounds Yesterday.

The game between the Los Angeles and Pomona baseball clubs, at the Sixth street grounds, yesterday afternoon, was so one-sided that many of the spectators, of whom only a very few were present, became disgusted and left the grounds. The Pomona club was at a disadvantage, however, as part of their men did not make their appearance and the Los Angeles boys had to lend them a man. The first, second and third innings were marked by no special features, except that the Los Angeles club made four runs in the first, one in the second and fourteen in the third. The Pomona club made no runs. At the beginning of the fourth inning the Los Angeles club got three men on bases, when Stockwell made a base hit to center field bringing in two, and the third man came home on a wild throw to third. Stockwell came home on an error of the first baseman, who failed to hold Whitehead's hot grounder to first. Whitehead worked his way around to third and came in on McCarthy's clean two-bagger to center field. The fielder fumbled the ball badly and McCarthy got three bases. He stole home on a dropped ball by the catcher. George got to first on four strikes, the catcher letting the fourth one pass him. George got all the way to third before the catcher recovered the ball For their half the Pomonas made nothing, Harkness, Cull and Devine going out in rapid succession.

The fifth inning was marked by George's long hit over the left field fence, allowing him to make a home run. At the end of this inning the score stood 31 to nothing, and the Pomona boys wanted to give up the contest. The Los Angeles wished to play it out, and the game continued. The audience had dwindled down to only a few men and boys. The remaining innings were devoid of interest, and at the end of the game the score stood: Los Angeles, 37; Pomona 0.

DIED AT WILMINGTON.

Sudden Death of Marcos Tossi From Natural Causes.

Coroner J. M. Meredith held an inquest on Saturday, November 26th, at Wilmington, on the body of Marcos Tossi. Andrew Veidovich testified: I reside in Wilmington, and am a fisherman by occupation. I know the deceased, and last saw him alive last afternoon, about 5 o'clock. He has been sick for some time, and not able to work. He told me something hurt him inside, on his left side. He told me he felt better last week. He was a very quiet man, and not a drunkard. Never knew him to have any trouble with any persons. George Beaver testified: I am a bartender, and reside in Wilmington. This morning about 6 o'clock I was near the house where the deceased roomed, and noticed the door open. I looked in and saw the deceased lying across the bed. He was undressed. I went in and looked at him, felt his hand and found it cold and he dead. I then went out and notified the Constable.

Lucas Morisich testified—I reside in Wilmington and am a laborer. I know the deceased, his name is Marcos Tossi: He is a native of Italy, married and about 27 years of age. I know nothing in relation to his death. He has been sick for the last two years. He told me he had been told by a doctor that he had heart disease. I saw him last Saturday and he told me he felt better. He has not been able to work for some time.

The jurors returned a verdict of death from natural causes.

THE HOTEL DEL CORONADO, CORONADO BEACH, SAN DIEGO COUNTY, CAL.

The magnificent building, of which the above illustration is a correct representation, covers 7½ acres, and is larger than any edifice of a similar character in the world. It is extremely difficult to appreciate its colossal proportions. No caravansary of the ancients or hostelry of modern times, can compare with it in extent or perfection of its arrangements, or can yield the same degree of comfort, elegance and refined enjoyment as it is prepared to furnish to its guests. It stands without a rival in the world—proudly overlooking the placid waters of the great Pacific, and impresses upon the mind of every beholder its grandeur, its immensity, and its magnificence as a structure. It is remarked by all who see it as one of the wonders of this wonderful age, and regarded as a credit to our great Commonwealth.

Progress and improvement have been almost limitless during the past quarter of a century. The marked changes that have been produced and the wonderful improvement that have been brought about by the use of steam, electricity, and other forces, have been of such magnitude that the world seems in that brief period to have entirely changed, so that the impossibilities of that time are accomplished now with the greatest ease. No department in life, however, has attained a higher degree of excellence than architecture has, or has kept so well up in the forward march, as may be witnessed in the very beautiful designs of modern structures, of which the above hotel is a most praiseworthy and highly creditable evidence. The style of architecture adopted in this mammoth hotel, is a grand conception, being a happy combination not confined to any particular age or school. While partaking largely of what is readily recognized as the Queen Anne style, it at the same time shows many of the quaint and formal features of the Elizabethan order of architecture. These styles have been improved, however, by being modeled so as to accord with the modern American idea of architectural symmetry and beauty—adopting the best of what has appeared before, irrespective of the age or school to which it belongs. Apart from the architectural splendor of the building, there is a winning fascination in the vicinity and its varied attractions, the purity of the atmosphere and the beauty of the view, which seems irresistibly to draw strangers and visitors to this point.

The building, which ranges from three to five stories in height is so admirably arranged that every bedroom is penetrated and warmed by the genial rays of the sun during some part of the day. The verandahs and porches facing the ocean are encased in glass, thus just the atmosphere desired can be obtained. The general form of the building is that of a parallelogram, built around a grand court 250x150 feet in size; and it is unequaled in splendor as it is in the space it occupies. Here the glorious sun has full play on the tender leaves of the rare exotics, on the white marble of the chaste statuary and on the cool and glistening waters which flow from the splendid foudtains that adorn the grounds, which are planted with many beautiful varieties of ornamental shrubs and trees, including some of the most delicate tropical productions. In the appointments and furnishings of the rooms, there will be an artistic harmony observed in the color of the furniture and carpets to suit the various apartments for which they have been designed, and the whole building will be brilliantly lighted by incandescent electric lights. Each department will be so managed, and the standard of perfection so nearly attained, as to satisfy the most exacting guest.

The Following Shows the Area and Capacity of the Principal Rooms, which Number 750:

Seating Capacity of Dining Room, 1,000.
Area of Restaurant Surface, 2,500 feet.
Total Area of Building, 7½ Acres.
Height of Dining Room Ceiling, 33 feet.
A number of Private Dining Rooms.
Four 85 foot Bowling Alleys.
Observatory 120 feet high.
Area of Breakfast Room, 4,800 feet.
Area of Theatre and Ball Room, 11,000 feet.
Twenty Billiard Tables.

CORONADO HEIGHTS.

The Pasadena of San Diego, and Charming Suburbs of Coronado Beach.

Look out for the Auction Saturday, December 31st.

The grand plateau, situated about 4 miles south of Cornado Beach, where this new and delightful townsite is being laid out and the streets and avenues are now being planted and ornamented with trees, shrubs and evergreens, occupies, beyond comparison, the most eligible and the finest position to be found anywhere on the beautiful bay of San Diego or along the shores of our majestic ocean, the great Pacific. On this elevated and lovely location the young city can sit enthroned in splendor, overlooking all other suburban places. They can but look up in admiration, and must, perhaps gracefully, yield the palm and glory to this, the brightest gem of Southern California.

What lends additional grandeur to this scene of exquisite beauty is the framework of this uncommon picture, formed by this white and glistening sands of the seashore, and by the placid blue waters of the beautiful bay.

No dread need be felt there because winter is approaching; no death-dealing winds come there, and no intolerable cold. But the pure elixir of life constantly inhaled, presents to the invalid a new lease "FREE GRATIS."

Coronado Heights will stand at the head of the list of all seaside resorts for health, pleasure and beauty.

The grand and picturesque surroundings, together with the splendid facilities for the full enjoyment of bathing in the surf or still water, boating and fishing on the bay, gunning, and other recreations in the mountains, all add to the claim this locality is entitled to as one of the most pleasant and charming all-the-year-round, sea-side resorts on the Pacific Coast. As the old Spanish Parde say of it:—"*Es es un lugar hermosisimo*," "That is a most delightful place."

Coronado : Heights,

PICTURESQUE AND ALTOGETHER LOVELY.

NEAR MOUNTAIN, BAY AND SHORE.

This magnificent townsite is the property of the Coronado Beach Company, under whose auspices it is being placed on the market. It will prove to be the grandest success of the day.

It will have three different means of communication—a motor line, a steamer and a fine turnpike road, besides the drive along the beach, a most charming one, which can be extended for a distance of some twenty miles.

Nearly 100 teams are now actively engaged in grading for the new motor line, three miles of which are already finished and the steel rails are being laid.

Trains will be running between Coronado Beach and Coronado Heights in a few days.

A new and handsome steamer will be running between Coronado Heights and San Diego, making regular and quick trips, long before January 1, 1888.

Water is being piped all over the plateau, which will bloom like a garden.

For the speculator it will prove to be the biggest bonanza of the present day, and for the homeseeker it will be a boon indeed.

Nature has done much for the Coronado Heights, the beauties of which captivate all who see them.

Look Out for the Auction Saturday, December 31st.

BATTLE OF GETTYSBURG.
WASHINGTON GARDENS.

Democrats, Come Out To-night!

"Not loud, but deep," are the murmurs of discontent along the line in the Republican ranks as to the Aldermanic nominations made by the party leaders on Saturday night. It is not the intention to create the impression that there is a general disapprobation; but the objections to some of those put forward are of such a nature that their defeat is certain in the event of good nominations being the result of the Democratic caucuses this evening. We might just as well recognize the fact that in all parties there is a very large contingent of voters who will not be bound altogether by party ties in these local elections. They are of the best part of the community, property-holders, tax-payers, heads of families, intelligent men, honest and sincere. These will go for the best men on whatsoever ticket they may find their names. And there are some out of this class of voters in our own ranks. It is therefore incumbent on us to name good men. If we do this, and thus keep the party solid, the sweep our ticket will make of the field will astonish us. Therefore, let all good citizens turn out to-night, and help select the ticket. The motives for this action are many and of grave moment. The course pursued by the Prohibitionists in the First Ward marks the programme of that party. While no compromise will be made on any measure short of absolute Prohibition, yet, wherever a Republican can be discovered who will pledge himself squarely on this issue, he will be supported. Mr. Mathews, of the First ward, who is the regular Republican nominee, has given such a promise. The result is the taking down of Mr. Woodhead's name on the Prohibition ticket and the concentration of the Republican vote on that man. Now, is there any voter in the city so obfuscated in his narrow intelligence that he must have the significance of this act explained to him. If there is, any sensible fellow in the pueblo had better spare his breath rather than attempt the explanation. That absurd person could not get an idea in his head by any process short of trepanning. Here is the Republican party nominating and voting for an out-and-out Prohibitionist. It is more than probable that this open course will not be pursued in all cases. There is a smoother way than this to get a council pledged to sumptuary measures elected. There are men on the Republican ticket who will not hesitate to play a double game to compass their ends in this regard. Look out for people who will run with the hare and hunt with the hounds to get into the council. There is no sure method for those who do not wish to see the city delivered over to a regime of narrow, "Blue Law" policy, but to vote the Democratic ticket. It is not too much to say that there is not a Republican on the list who can be trusted on this question.

Then there are the numerous branches of Public Works, in which large money is to be spent during the next two years, and this consideration is drawing jobbers into the public arena as the carcass draws the buzzards to feast upon the prey. Men of tried integrity, of standing in the community, and far removed from all suspicion of jobbing, are the only sort who should find favor in the eyes of the electors to-night. Let us distinguish ourselves by nominating such men, and such as will add to these qualifications that further characteristic of being men of broad views and of a progressive policy.

The Soldiers' Home.

The National Committee to select a site for the new Soldiers' Home on this coast will be here to-day. These gentlemen have been to see all the most attractive spots in the central counties, and liberal overtures have been made to have the institution awarded to San Mateo, Napa or some other county. In these efforts San Francisco will come to the aid of any locality around the bay. We must depend on our own unaided efforts But there should be no stone left unturned to secure the Home for this section. If the comfort and enjoyment of the old soldiers were the only things to consider we would get it without our moving a finger. On Saturday morning San Francisco was environed by a cold wave which carried the mercury fourteen degrees below the freezing point of water. Next August in these interior and pent up valleys the metal will be boiling over the top of the tube. With us all seasons are perfect in their climatic elements. We have no severe frost in the winter, and no prostrating heat in the summer. The effects of our climate on ailments such as flesh is heir to draw to our shores, multitudes annually from all parts of the Nation. Physicians in all parts of Europe are beginning to realize that South California is far preferable to the choicest portions of Italy in cases of severely impaired health. Rheumatism, asthma, pulmonary diseases, debility arising from old age, and kindred troubles find immediate relief in and about Los Angeles. These are just the ailments to which the veterans are subject owing to their exposure in the war. And, for these reasons, here is where the home should be.

But the question will not be decided solely on these grounds. The amount of substantial inducements offered the committee will not be without influence. Therefore, every possible effort should be made to show as much liberality as any other place. The community here can afford to do as much as any in the State. The prize to be secured is worth an effort, and will repay any reasonable outlay to win it.

ORANGES in this section are just beginning to color. The fruit is of good size and promises to be very fine. Where the orchards have been cared for the crop is good, but the total surplus for shipment will be very small as compared with other years. Los Angeles city has until very recently furnished a large number of carloads, but it is doubtful if there is enough for local consumption on the trees this year. Who has oranges in this city? The Wolfskill orchard is cut up into lots and the orange trees are converted into firewood. The same is true of the Bliss grove, the McGarry orchard, that of the late Colonel Godfrey, and scores of others. There are little or no orchards remaining, and go where one will the groves are either gone, root and branch, or the trees are dead from neglect. The city has claimed the land for residence purposes and the fruit business has gone to the wall. What has happened in and about this city will be found repeated in nearly all the towns of this section. San Gabriel used to furnish about half the oranges shipped from South California. How many will that valley ship this year? The Sunny Slope orchard will not furnish any to speak of. The Titus Grove and the Foord Grove have both been swallowed up by the subdivision octopus. Mr. Chapman reports a good crop. Colonel Dobbins always succeeds in getting good results from his trees. But few other orchards in that vicinity have much fruit to spare. Riverside will have to take the lead in this industry this season, and for several to come. Southern California must be up and doing in this matter of replanting her destroyed orange groves. Put them out of the way of the townsite octopus, that is if any spot can be found in this section which will not be needed for residences for the hundreds of thousands of eastern people who are coming in.

DE LESSEPS in his semi-monthly called the *Bulletin du Canal Interoceanique*, of date November 2d, 1887, says that his dredges during the month of July worked out 393,000 cubic metres; in August 634,000, cubic metres, and in September only 449,000 cubic metres. Now the cubic metre is considerable more than a cubic yard. It would seem, therefore, that if this showing can be kept up sufficiently long the Chagres river can be brought to the requisite depth for ships, unless the deposit of the river equals what is taken out. Were such the case it is probable that De Lesseps would have discharged the American Contracting and Dredging Company and would have given up the digging of the canal. From the spirit of his paper it is clear that work is going on in the hills, and that he is not badly scared by the immensity of the task he has undertaken. For a certainty the old gentleman is game enough to have been born in the United States.

CITIZENS who have occasion to cross at the confluence of Spring, Main and Temple streets will regret to learn of the painful nature of the accident which happened to the polite police officer who usually guarded that point. Captain Weatherman, the officer so well known to all passers, was knocked down there by a hack last Saturday. It was discovered on Sunday that he suffered a fracture of the right thigh. The hope will be general that Mr. Weatherman may rapidly recover from his injury. The officer has been not only faithful in the performance of his duties, but he is courteous to a remarkable degree in his manner of doing them. Were all the wearers of the star gentlemen, as Mr. Weatherman has shown himself to be, great would be the gain to the public.

UNPRECEDENTED reports as to the weather in the Northwest, will be found in our telegraphic news this morning. At so early a date even in the Hyperborean regions of Minnesota and Dakota, the mercury does not get as a usual thing down to from ten to twenty-six degrees below zero. At favored points the temperature is at ten degrees above the zero point. Our local signal service officer received advices showing that in Texas the thermometer was down to ten degrees below zero. The moral to all this is a larger higera of people out of such killing frosts to our land of eternal flowers, and to our unclouded sun shine!

THE great Territory of Dakota declares for a division of its domain by a small majority. The decision is a wise one. The West is handicapped in the Senate as against the East. Think of Rhode Island casting the same vote in one of the co-ordinate houses of Congress as does New York, Pennsylvania or Texas. It is an instructive fact, too, to find that far-off Territory in the Northwest casting 70,000 votes. It is but a few short years since there were no voters in Dakota.

PEOPLE of narrow mind, who look upon liquor as the one evil by which men go to ruin, should learn by experience that Prohibition does not prohibit. The HERALD yesterday contained an exhaustive article showing that the liquor traffic is not restricted in Maine by the Prohibition law in force in that State. The internal revenue returns show this fact to a dead certainty. It has always been so.

FRESNO county is credited with being able to load three hundred and forty cars with raisins from the crop of this year. At even ten tons to the car that is an aggregate of three thousand four hundred tons, or nearly seven millions of pounds. At ten cents a pound wholesale this comes to the snug sum of $680,000. That is pretty good for one crop for one county.

ATLANTA, Georgia, has tried Prohibition for the past two years. It has failed to prohibit, and at the election there last Saturday on this very question, the dispatches inform us that the city has gone "wet" by a small majority. This is the result of experience.

DEMOCRATS in the Bay City are vigorously hammering away on the effort to induce the National Convention of that party to meet next fall in San Francisco. They are blooded enough to hope for success. May they reach it.

A Chronic Tendency Overcome.

Many persons are troubled with a chronic tendency to constipation. They are of bilious temperament. The complaint to which they are subject, though easily remediable by judicious treatment, is in many cases aggravated by a resort to drastic purgatives and cholagogues. As the human stomach and bowels are lined with a delicate membrane, and not with vulcanite, they cannot stand prolonged drenching with such medicines without serious injury. Nothing restores and counteracts an habitual tendency to constipation so effectually as Hostetter's Stomach Bitters. Its laxative effect is gentle and progressive. It neither convulses nor weakens the intestines, and its effects are unaccompanied by griping pains. It arouses the liver when the organ is sluggish, promotes digestion, and encourages appetite and sleep. For fever and ague, kidney troubles, nervous complaints and incipient rhumatism, it is incomparable. Take a wineglass before meals and see how soon you will relish them.

When baby was sick, we gave her Castoria.
When she was a Child she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

Sudden Death.

DR. FLINT'S HEART REMEDY will prolong life by preventing those sudden deaths from heart disease which bring untold grief to families, often plunging them into poverty, because of the untimely decease of the bread-winner. ADVICE TO MOTHERS.

Ladies who are troubled with cramps and nervousness should drink Damiana Bitters. It is pleasant to take.

THE GREATEST STUDY OF Mankind is Man.

Who remembers not how the distressed mother, her child's entreaties tries to smother, that she insist not the horrid dose be taken, the remembrance e'en now does nausea awaken, and fond father, to be witness of his child's torture, would rather pay high price, if money could purchase Cathartic nice. We have it now! And great DE PRATI'S name, appears upon the scroll of Esculapian fame, for after long study wrought suit, has hit upon *delicious fruit* to cure our ills. REV. VAN CLEAVE.

His Discourse at the Fort Street M. E. Church.

Rev. Van Cleave, Presiding Elder of this district, preached to a large and appreciative audience at the Fort street M. E. Church yesterday morning, taking for his text the thirteenth chapter of Hebrews, and the sixteenth verse: "To do good and forget not." To do good is better than sacrifice. "If a man love me," says God, "he will keep my commandments. The divine good rests upon the heart of every soul. The true Christian cannot be at ease when he knows that numbers of persons surround him who are not yearning for a transformation. Godly people have three distinguishing characteristics: First, they avoid all evil. Second, they do all the good they can to others. Third, they attend to the ordinances of God's house. We hear the words of the Lord ringing out, "Go work in my vineyard." We have a work to do. We have no time to sit on street corners whittling sticks and chewing tobacco. Christians must be active and aggressive, but to do this we are not to go out of the world and hide ourselves in cover. Christ set us another example. He went out among men and women, and did them good. Christians cannot live in a clam shell. They must have room; they must have the entire world for their battlefield. We do not realize the danger that surrounds our children. We meet friends on the street, knowing that they are in the crumbling age of ruin, and yet we will say not a word to entice them from this broad road on which the millionaire is traveling. To labor in the vineyard of the Lord is a test of faith. Faith without work is dead. There may be some here who do not appreciate the work done in the Sunday school. This Church would have vastly more power if we were working more in the Sunday schools and class meetings. There is no other instrument to bring these thousands of young people to the kingdom of Christ but you, my dear people. Some people say the world cannot be saved. Wellington once said to one of his officers: "Take that fortification." The officer said: "It cannot be done." "Can't be done," replied Wellington: "I tell you it can, for it is on my order-book, and it must be done." We often abuse and scorn at persons who are seeking for our own good. Gough, who spent his life preaching temperance and lifting his fellows out of the monstrous curse of intemperance, was often sneered and laughed at. The minister who is laboring for the salvation of our souls is called a fanatic. Young ministers who came to John Wesley for charges were asked, "Have you had any conversions under your preaching?" "No, sir." "Have you made any one mad?" "No, sir." "Well, then you had better quit. I do not believe we should live like snails. We should not turn away from other people because we do not believe all they say or as they do. Our church has never looked at christianity in such a narrow way. The world is our parish.

The worst enemies that we have in the world to-day are the persons in our church who are not true to the cause. What harm are Ingersol and other disbeleivers doing? None. What shall we do? We must arouse these sinners. God will take hold of them, and let me beseech you to bring your children to the Lord; make pleasant homes for them. Godly homes for them, and they will not go astray, and let us so live that when we come to die we may find a home in heaven.

MAN'S FOOD.

Rev. C. S. Uzzell's Sermon at the First Congregational.

Rev. C. S. Uzzell, of the First Congregational Church, preached a very interesting sermon yesterday morning, taking his text from Exodus xvi, 21.

"And they gathered it every morning, every man according to his eating; and when the sun waxed hot it melted."

This text is in connection with the children that were in bondage which Moses led out to the promised land. To-day I am before you to help the Christians who have come here out of the bondage of sin. God led the people about, through the way of the wilderness of the Red Sea, and the children of Israel went up out of the land of Egypt. He led these people in the day time by a pillar of clouds as it was impossible for one to journey across those plains with the sun beating down on the sands. In the night he went before them in a pillar of fire to give them light. What a wonderful thing for God to break the sun's rays from so many thousands of people and what a powerful tight to lead them by, far exceeding our electric lights. When these people had reached the seashore who should they see back of them but Pharoah and his army. Escape seemed impossible, with mountains each side, the sea in front and Pharoah and his army behind. And they said unto Moses, "Because there were no graves in Egypt hast thou taken us away to die in the wilderness? Wherefore hast thou dealt thus with us, to carry us forth out of Egypt? Is not this the word we did tell thee in Egypt, saying, let us alone, that we may serve the Egyptians? For it had been better for us to serve the Egyptians, than that we should die in the wilderness." Moses lifted up his rod and stretched out his hand and divided the water so it stood like the great walls eighty-four feet high. Is not this evidence of God's omnipotence, to divide water for twelve miles at that depth? Yet unbelievers will say that He did not divide the waters, but He caused the wind to blow so the waters were shallow and the people waded across. I say no man could live in such a gale. Others say that the sands were washed so the people walked on the bars. What was the matter with Pharaoh's men? Could not they walk in the sand? Josephine says that Pharaoh's army consisted of fifty thousand soldiers on horses, two hundred thousand footmen, and not one of this number was left to tell the fate of the army. Oh, what a praise-meeting that must have been when Moses' followers sang that song of redemption. "I will sing unto the Lord, for he hath triumphed gloriously; the horse and his rider hath he thrown into the sea." It seems as though that they could no longer doubt God's power, but they did when they came to Marah, for they found the water bitter, and murmured against Moses, saying: "What shall we drink? But the Lord "showed him a tree, which, when he had cast into the waters, the waters were made sweet." When they had journeyed into the wilderness of sin, "and the white congregation of the Children of Israel murmured against Moses and Aaron in the wilderness." Then said the Lord unto Moses, "Behold, I will rain bread from Heaven for you. And they gathered it every morning, every man according to his eating."

Here they are out on a desert where there is no trees, and the Lord is furnishing them with sweet water, quails and manna. Some one asks, What is this manna? Let it be what it may, we have positive evidence that it sustained life and was to man physically what religion is to him spiritually. The amount of food required for all these people would be 4000 tons, which would require 500 cars to hold it, making a train one and a half miles long. Just think of it! This amount fell from heaven every day for forty years, and at the small price of one cent per pound would have cost $565,006,000. God furnished all of this and did not make no assignments, borrow from any one, or lack at any time. Christ says, "Your fathers that lived on manna are dead, and except that you repent and are baptized, ye are lost." We find that every one had to go out and get their own manna, they could not send any one, what a spiritual lesson; I have no grace for to-morrow; I could not obtain only enough for to-day. Now, christians, let us go out every morning for this spiritual manna, it will make us noble kings, help us to be more penitant and worthier citizens, besides insuring us a home with God.

DEMOCRATIC CAUCUSES.

Where They Will be Held and Who are Candidates.

This evening at 7:30 o'clock the Democratic citizens of each ward are requested to meet in their various wards for the purpose, first, of nominating candidates for membership of the City Council, and, second, of selecting delegates to the convention to be held on Wednesday evening at Justice Austin's court room.

The ward caucuses will be held in the following places:

First Ward—Southern Hotel.

Second Ward—Justice Taney's court room.

Third Ward—Justice Austin's court room.

Fourth Ward—Judge Hutton's court room.

Fifth Ward—Morris Vineyard hose house.

The First Ward will select ten delegates, the Second Ward fifteen delegates, the Third Ward nine delegates, the Fourth Ward nine delegates, and the Fifth Ward seven delegates.

There is at present much speculation as to who will be selected to represent the various wards in the City Council to-night.

Among the names mentioned for Councilmen from the First Ward are Charles W. Schroeder, real estate agent residing at No. 827 Buena Vista street; William Vickery, President of the East Side Bank, residing at No. 32 south Daly street, East Los Angeles; William Hughes, of Palmer & Hughes, residing at No. 25 north Hansom street, East Los Angeles; C. P. Thurston, present member Board of Education; William Lacy, of Lacy & Viereck Hardware Company, residence No. 1014 Downey avenue; James Hawley, residing at No. 47 Chestnut street. For the Second Ward, T. J. Cuddy, real estate agent, residence No. 39 north Spring street; J. Kuhrts, present member of Council; P. Ballade, grocer, residence No. 100 Aliso street, and Roman Grant, residence No. 24 Schuyler street, Boyle Heights, are mentioned. For the Third Ward the names of John F. Humphreys, of Humphreys & Riggin, residence No. 325 south Fort street, and William F. Bosbyshell, cashier Southern California Bank, are prominently mentioned. In the Fourth Ward, B. Cohn, residence 66, South Main street, Simon Gless, residence 47 Boyle avenue, Herman B. Benedict, capitalist, 413 Louisiana avenue, Boyle Heights, and B. Chandler, residence 545 Aliso avenue, Boyle Heights, are in the field. In the Fifth Ward John P. Moran, formerly a councilman, Thomas Brown, lawyer, residing on Adams street, near Washington, and John Maskell, fruit dealer, residing on Main near Adams street, are mentioned.

It was hoped that R. E. Wirsching would allow his name to be placed on the ticket from the Fourth Ward, but he stated last night that he positively declined to run, owing to business engagements and an eastern trip which will extend over a period of six months. He desired however to return thanks to those who proposed his nomination.

John Hanley of the First Ward also declined to run, but his friends state that they hope they can induce him to accept the nomination.

Residents of the Fifth Ward seem to be very anxious to have John P. Moran run from that part of the city and are convinced that he would properly represent them, since he has been in the Council and understands its business.

A number of the prominent citizens of the Fourth Ward met last evening and drew up the following letter which is self explanatory:

LOS ANGELES, Cal.,
November 28, 1887.

EDITORS HERALD: Believing that the best interests of this city, and especially those of the Fourth Ward, of which we are old residents, will be served by the election to the office of Councilman of B. Cohn, we should like, with the majority of voters of that ward, to earnestly protest against that gentleman declining a nomination by the Democracy sure to be given him.

We understand that Mr. Cohn is inclined not to accept such nomination. We hope, with all good citizens of the Fourth, irrespective of party affiliation, that he may see fit to do now as he has in the past—serve the city and stand by his party. Let Mr. Cohn not decline.

SEVERAL TAXPAYERS.

Miss Mather To-Night.

Miss Mather will appear as "Juliet" at the Grand to-night, and this will be the last performance of this fascinating *rôle* during the present season. Sales of seats are already quite large.

A telephone message was received here from San Bernardino yesterday which states that every seat in the house there is sold for Miss Mather's first appearance in that town. This is the more remarkable from the fact that San Bernardino had not been billed at all for the attraction.

A. O. U. W.

The following officers of Germania Lodge, 241, A. O. U W., have been elected for the ensuing term: P. M. W., H. Bruning; M. W., Th. Friese; Foreman, D. Enistein; Overseer, Chas. Brauer; Guide, O. Silderberg; Recorder, Chas. J. Peteler; Financier, G. Stoesak; Receiver, Theo. Froblinger; I. W., Geo. Langeloh; O. W., Chas. Woerz.

THE WORK BASKET.

Simple Christmas Gifts That Little Hands May Make.

It is not too early to begin work on Christmas presents, especially if there are many to be made by hand. The shops offer many novelties that can be bought cheaper than made, yet there are any number of pretty things which cannot be bought, and others which are far daintier and of more value when made by loving hands. Here are a few directions for simple and inexpensive gifts, which can be easily made by little hands and fingers.

A shoe bag, a clothes bag and a brush and comb holder will be found valuable for one who has a small bedroom. To make the set, purchase two yards and a half of some pretty chintz that will match the furniture of the room. That made to resemble Watteau tapestry and depicting ladies and gentlemen in fantastic costume, or a blue or crimson, or brown ground is very ornamental of itself.

To make the clothes bag, take one yard, sew it up neatly and put a braid drawing-string about two inches from the top. This should be hung in the clothes closet or behind the bed head and used for soiled clothing. The shoe bag is a trifle more intricate. Take a paste-board box cover, about a half yard long and as wide, and cover this neatly with the chintz, bordering it with braid and leaving two little loops at the top by which it may be hung up. Take a piece of the goods, three-quarters long and a quarter of a yard deep, hem the upper end and put a running braid through it, tying in a bow in the centre, so that it may be let out as wanted. Fasten this to the lower part of the pasteboard square, stitching it at the ends and in the centre to form two pockets. This should be fastened to the inside of the closet door, and will hold shoes and slippers not in use. The comb and brush case is made in exactly the same way, but the pasteboard square should be made eight inches wide and twelve long. Of course these articles may be made more fanciful, especially the comb and brush bag, which may be of silk or plush or any pretty material.

A pretty little watch case is made out of a baby's shoe. A little china one can be bought for 15 or 25 cents, and this should be fitted with a wadded lining of pale blue or rose pink silk or satin, coming several inches above the shoe top and drawn together by a little ribbon. Such a shoe is an ornament to the bureau, and may serve as a receptacle for hairpins, buttons, and other articles, if not for a jewel case.

A stocking bag will make a nice gift for the grandma or mother. This may be made out of chintz or any bright goods. A pasteboard, square or round, six inches in diameter, is first cut out, and this is neatly covered on both sides with the material. Then a piece of goods a yard long and a good half wide is sewn together, gathered top and bottom, one edge being sewed firmly and evenly to the pasteboard and the other provided with a ribbon running-string. Two little pockets inside, one for needles and thimbles and one for cotton, will add to the usefulness of this most useful article.—[New York Journal.

"Yes, splendid."

"I just know I'll laugh right out."

"Yes, you would. Now don't you dare look at me."

"I *will* too."

"*Mame!*"

"Oh, I *will!*"

"I'll laugh right out, sure."

And she does. She spoils two or three plates by "giggling right out," and she goes away declaring that she "just knows" she'll look "too perfectly awful for anything in the picture."

It is living through such scenes as this daily that causes photographers to have a worn and faded look, and makes them old before their time. Many of them break down under the strain and die young.—[Detroit Free Press.

Painters and Models in Paris.

Some interesting statistics relating to painters have been lately compiled. According to these there are in Paris about 8000 artists of the brush, of whom between 2000 and 3000 are women, and 300 are foreigners of various nationalities. About 70 of these are famous, while the others are made up of wealthy persons who paint for pleasure, of people who are specially employed by the Government, and of the producers of "pot-boilers," who paint portraits and landscapes for cheap picture dealers or for foreign exportation. The army of painters' models in Paris is a large one and increases day by day. Many of these models are educated, and sometimes become painters themselves or efficient art critics, whose judgment is often consulted even by eminent artists. The models are only employed between the ages of 18 and 19 by painters of the nude, but some of them find work until they are 25 or 26, after which their forms completely lose the grace and contour of early growth. The women who "pose" in the studies are generally paid at the rate of 10f to 25f per diem. The most numerous of the models are the Italian women, who are often preferred to French because they are more tractable, for the model has often to sit or stand immovable for hours, and this the Parisienne is particularly disinclined to do.—[Daily Telegraph.

FAIR ANAHEIM.

Home-Seekers, Read Carefully This Column.

Anaheim is the oldest colony in Southern California. The settlers who, in 1857, selected this spot were men of experience in all the varied affairs of life. They looked all over the State and pitched upon Anaheim as, in all respects, the most attractive spot they encountered. The history of the past thirty years, the wealth of the old settlers, the business done in the town and the products of the section fully justify the choice made by these prescient colonists.

Anaheim is situated about 26 miles southeast of Los Angeles on a branch of the S. P. Railway, which is soon to be developed into a main line, terminating at San Diego. The town is fourteen miles from the Pacific ocean, at a small bay known as the Anaheim Landing. There are about 3500 people in the town of to-day, and there are churches of all the leading denominations, a fine public school—about the best in the county—stores stocked with goods of all sorts, in abundant supply and of the very best in the market. There is a bank and a good hotel—with a second now building and a third quite certain soon to be begun. Then a large and finely equipped girls' school will be erected at a very early day. The ground has been bought—an ample piece, three and a half acres in the very heart of the town—and the plans are being drawn. The streets in Anaheim are laid out with regularity and they are broad and smooth, with sidewalks, and many of them are aligned with fine shade trees. The residences in the town are a model of neatness and comfort. The gardens bloom with rare flowers at all seasons of the year, and everything bears an aspect of thrift and prosperity, such as one rarely encounters in any town in any section of the country.

For healthfulness fair Anaheim has no rival on the coast. The town site lies on a ridge of land, and the contour slopes gently from Anaheim, falling away to the east towards the Santa Ana river, to the west towards a wide wash and southerly towards the ocean. The soil is quite pourous and this contour of the land and the character of the soil furnish a system of natural drainage which is quite perfect.

The climate of Anaheim cannot be surpassed in Southern California. Northerly lie a range of high mountains and 14 miles to the south is the sea. The air currents come from the southwest and are always refreshing and bracing because of their passage over the unmeasurable expanses of the Pacific ocean. Here is the place for healthful, happy homes for all comers in search of the very best of Southern California.

SPECULATORS READ THIS.

The above description of Anaheim will be found true in all respects. Go and see before you buy elsewhere. True as it is, it is only half the truth. This town lies in the center of an immense area of the finest land on the good green earth. This stretch of country extends for from 14 to 30 miles around. It takes in the rich North Anaheim and Placentia country on the north. Here the new town of Fullerton is going up at a marvelous pace. It has a hotel, a great many fine residences, and these are being added to daily. To the south lies the richest grain, fruit and dairy district in the State. All about vines, oranges, nuts, and all the citrus, deciduous, semitropic and other fruits grown to perfection. There is a railroad to Anaheim, now, with trains twice each way daily. There is another railroad, the California Central, now being built from this point to Los Angeles. It will be in operation by the end of the year. The S. P. Company contemplates the construction of a line from their depot in Anaheim through North Anaheim, Fullerton and Placentia. A company is now organized to build a railroad from Anaheim to Anaheim Landing, where a harbor is to be constructed in the near future.

Anaheim is, therefore, to be the center of a very considerable system of railroads. She will grow from this on in population, business, wealth and all the elements of a prosperous place. Remember the boom has just begun here. Anaheim real estate has scarcely risen in price beyond the figures ruling three or four years ago. While all around lands are selling at $500, $800 and $1000 per acre, the pick of Anaheim is still to be had away below the lowest figure above. With a good business, unrivaled soil, the best climate in the country, the most abundant supply of water, crystal clear, Anaheim lands are held at less than half the figures asked elsewhere for property in all respects less desirable than this. *Now is the time to buy.* The boom is on and it will swell to a full tide in a few weeks.

INVESTORS READ THIS.

A week or two ago there came to Anaheim ten families, seeking houses to rent, while they could buy a lot and build for themselves. There was not one cottage even to divide with the ten familes. There is not a store to be had to open a new business. There is a demand for houses and stores. Anaheim has two amusement halls, but she needs a fine opera house. The citizens are contemplating the erection of one. Any person who will build a house in Anaheim will rent it at a good per centage on its cost the day it is built. He who will put up a store will find a tenant as quickly. His money will be invested well for all time to come. There is room for great expansion, the growth has begun and it will continue.

WHOM TO SEE.

NEWS NOTES.

Charles Holmes and John Wilson were arrested last evening on Domingo street by Officer Richardson for fighting.

The City Council will meet this morning at 10 o'clock. This will probably be the last time this Council will transact any official business.

The Southern Pacific train due yesterday afternoon was delayed seventeen hours by a collision with a freight near Sumner. No one was hurt, but the engines were badly broken.

Mr. J. M. Griffith's residence on Fort street below second, is being moved back to Hill street. A great brick block, 120x165 feet on the ground and four stories high, will be put up on the Fort street front.

All the mails were late in their arrival yesterday. The train from the East was sixteen hours late, the local from San Francisco was in one hour behind time, and the east-bound train from the north was four hours behind.

Work on the foundation of the Southern Pacific depot is rapidly reaching completion, three-fourths of the walls now being in place. A force of fifteen men is now engaged in the work. Additional tracks will soon be laid, and the construction of the building begun.

The daughter of Michael Leidel has been missing since last Tuesday. She was living at 508 Olive street, and before leaving handed her money over to her sister. Any information in regard to her whereabouts will be thankfully received by her father at Ballona.

As Officer Boland was going his rounds last evening he attempted to arrest two fellows on Alameda street, of the names of Vercosi and Lahes, for fighting. Both resisted him and handled him quite roughly. Officer Luvens lent his assistance and they were lodged in jail.

Personal Mention.

J. M. Dumphy, of Sacramento, is in the city.

J. S. Pellon, of San Francisco, is visiting Los Angeles.

W. A. Clark, of San Francisco, was in the city yesterday.

J. S. Street, of San Francisco, has been visiting the city.

Mr. and Mrs. C. B. Fredrick, of Chicago, are visiting Los Angeles.

Mr. and Mrs. H. C. Babcock, Miss H. Babcock and Mrs. W. S. Babcock, of Denver, are sojourning in the city.

John Dolbeer, of San Francisco, who is largely interested in the Southern part of the State, has returned to his home.

W. E. Bloss, the affable clerk of the Hotel Brunswick at Santa Ana, was in this city yesterday. He says things are booming all along the line in that prosperous burg.

The Tyrolese at Anaheim on Saturday presented Major P. S. Domey with a handsome gold-headed cane. It will be remembered that General Mathews mustered in that company on Saturday. Major Domey organized the Tyrolese during his stay in Anaheim last summer.

A HEAVY LOSS.

Edward Singler Robbed of Over Three Thousand Dollars.

Edward Singler sold out his business in San Diego a few days ago and came to Los Angeles. This being Sunday, he was, of course, unable to place it in a bank, so kept it in his hip pocket. Last night he went to Hazard's Pavilion, and as he reached into his pocket for money to pay for his entrance, he was astonished to find that the entire amount, $3250, had been taken by some clever pickpocket. Mr. Singler described the notes as of the following denominations: Two $500 bills, twelve $100, and the rest in $50 notes. He reported his loss at police headquarters but chances for the recovery of the money are slim. This affair taken in connection with the Hollingsworth diamond robbery goes to show that Los Angeles has, at present, a number of very clever crooks in its midst.

Mr. Singler has a room in the Melrose House, corner Fourth and Main streets, and arrived in the city on the 21st instant. He did not receive his money until to late to put it in bank on Saturday.

ATTEMPTED ROBBERY.

The Burglars are Seen But Make Their Escape.

Last night at about 8 o'clock thieves came very near affecting an entrance to the Boston dry goods store.

Mr. M. J. Burns, the man employed as a night watchman for the store, had just returned from supper and saw a crack in the rear doors and heard a noise. He called out to know what was the matter, when the men ran away. He tried to catch them but they gave him the slip. The men were in the rear of the building on New High street, and in a few moments would have had the doors open. They were both young white men. A like attempt was made upon this store several months ago, but the watchman, as in this case, prevented its being successful.

Crazy Lightning.

A. J. Church caused another sensation on Spring street yesterday. Jailer Russell was taking him from the Police Station to the County Jail, and when opposite his old haunt, the Nadeau, he darted away from Russell and began shouting and gesticulating in the middle of the street, protesting against his arrest. After a little bother he was finally lodged in the County Jail. When asked why he made the fuss, he said that he wanted every one to know of his arrest, and provoke some interference, that he might escape as he had done on a previous occasion.

LETTERS FROM THE PEOPLE.

[The tenor of communications appearing in this column is not necessarily endorsed by the editor of the HERALD. The writer who desires to be heard in it should always accompany his screed with his full name not necessarily for publication but as a guarantee of good faith.]

The Chinese Again. "Justice to All."

EDITOR HERALD—SIR: Noticing a leader in this day's *Tribune* upon the increase of Chinese in this country, notwithstanding various Restriction Acts, and feeling sure that the hostile feeling towards them is at present only latent and will, so soon as we feel we can do without their help, break out again, I would like to be allowed to suggest a remedy that has not, so far as I am aware, been offered. It will act with perfect justice to both white and Chinaman; will not be contrary to any treaty obligations, and will injure nobody.

The suggestion is, that after a certain date no Chinaman shall be allowed to enter this country for hire. That no Chinaman at present in this country who once leaves it shall be allowed, under any circumstance, to re-enter it.

That any Chinaman who remains in this country after——years shall be compelled to become a citizen. The number of years can easily be decided upon. There, Sir, I think is a remedy that should meet with the approval of Democrat, Republican and Mugwump, and of any man in office who is none of these, but being in wishes to remain in, and may be designated a Grab-wump. Yours truly,

ANGLO-AMERICAN.

SIGNAL SERVICE.

Reports of Eastern Weather to be Received Here.

George E. Franklin, Signal Service officer in this city, yesterday received the following telegram:

WASHINGTON, November 27.— Extensive cold wave now covers the Rocky Mountain region as far south as Texas. The temperature is from 10 to 20 degrees below zero and will remain below freezing north of Texas and west of the Mississippi three or four days. GREELY.

It will be remembered that last year an effort was made to secure reports of the state of the weather east of the Rocky Mountains so that the fruit shippers could decide when to, and when not to send their fruits East. Last year the efforts to obtain these reports was a failure, but lately it has been decided by the authorities at Washington to send reports to Los Angeles from December 1st until May. The telegram which came through yesterday was a little earlier than expected but the unusual coldness of the weather at the points indicated rendered the information it contained important, and that was probably the reason it was sent.

ASTHMA, BRONCHITIS, CATARRH,

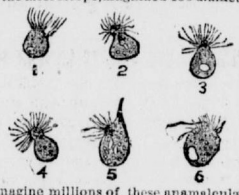
And other diseases of the organs of respiration, treated by the

ANDRAL-BROCA SYSTEM OF MEDICAL INHALATION,

AND GENERAL TREATMENT.

Catarrh of Nose and Throat.

I do not claim that I can cure every case of catarrh, but I do claim that my method will cure the large majority of cases after all other means have failed. The cure is permanent, as can be proven by cases which can be referred to, treated three years ago in this city, with no return of the disease. The fact is now admitted by the best medical writers that chronic catarrh is caused by the presence of living parasites, microscopical in size, in the tissues. The cut below shows these bacilla as they appear under the microscope, magnified 480 diameters.



Imagine millions of these anamalcule in the nose, throat and lungs, as well as the minute eustachian tubes leading from the back part of the throat to the middle ear, and you will imagine the misery they can produce. Some go as far as to claim that these insects may penetrate into the brain, and thus cause the distressing headache that is not unfrequently present in bad cases of catarrh.

My method of treatment is to use such remedies as will destroy these parasites for local treatment, and at the same time regulate any abnormal condition (such as impure blood or disordered liver, which will predispose to the development of the catarrh germs,) by the proper constitutional remedies. Every case will be relieved by this treatment, patients often seeing improvement from one treatment to the next, and every case can be cured where the blood is not so thoroughly diseased that no treatment will benefit it. The local treatment is always painless, and can be used at home with very little trouble and no detention from business.

Medical Advocates of Inhalation

Professor Hueber, of the Berlin University, on page 296 of his "Practice," says: "Diseases of the lungs and air-passages present the proper field for the use of inhaled remedies, and the success of inhalation in this class of maladies often seems little short of the miraculous."

Sir Andrew Stewart, writing on "Pulmonary Consumption," says: "By this method (inhalation) the proper selected remedies are made to act on the immediate seat of the disease with most favorable results, far exceeding even the claims of the first advocates of inhalation.

Dr. Fordyce Baker says: "Inhalation when employed by a physician of skill and experience, yields an extraordinary large percentage of cures in diseases of the air passages. It is unfortunate that so few ordinary practioners have had the training necessary to the use of this method."

Dr. R. Hamilton, of the London Hospital for Diseases of the Chest on page 109 of his work on 'Diseases of Respiration," says: "Medical inhalation, with proper constitutional treatment, affords the only hope in the great majority of these cases."

CATARRH!

Throat Diseases, Bronchitis, Asthma, Consumption,

Together with Diseases of the Eye, Ear and Heart Successfully Treated by

M. HILTON WILLIAMS, M. D. M. C. P. S. O.

273 N. MAIN STREET,

A few doors south of the New Post Office, Los Angeles, Cal.

Consumption can be cured. This has been demonstrated in thousands of cases treated by DR. WILLIAMS, with his new system of medicated inhalations combined with proper constitutional remedies fo the liver, stomach, blood, etc.

Probably no system of practice ever adopted has been so universally successful as that introduced by Dr. Williams for the cure of Catarrh, Throat Diseases, Bronchitis, Asthma, and Consumption.

CATARRH.

To those who are afflicted with any of the different forms of Catarrh, we would say, there is no disease which presents a greater diversity of symptoms, none more loathsome, insidious, and dangerous as Nasal Catarrh, especially if complicated as it almost always is, even from its first appearance, with an affection of the throat.

From the earliest symptoms (which are generally attributed to a "cold in the head") to the various ugly and distressing stages through which the disease passes the patient is hopeful of recovery, and rarely gives it proper attention until certain alarming symptoms present themselves, denoting unmistakably the rapid advance of the malady to the lungs. Indeed, so various are the symptoms that the presence of the disease is not always known, or even suspected, until it has reached a stage difficult to arrest. The disease may or may not be attended by a discharge from the nostrils or throat; but there is usually present a morbid secretion and a frequent disposition (especially in the morning) to clear the throat, and the effort to do so is often, though not always, attended by expectoration; there is a sensation of heaviness in the frontal part of the head, and the brain sometimes suffers to an extent producing headache, vertigo and confusion; it becomes difficult to think clearly and to concentrate the mind; the memory becomes impaired and the intellect enfeebled; despondency of spirits and an excitable condition of the nervous system. Such is the effect of the disease, and if to this train of symptoms (which not infrequently leads to insanity or idiocy) we add many of the more loathsome physical effects, as caries, or rottenness of the bones of the face and head, a most offensive smell to the breath, and corrupt, morbid and poisonous secretions, destruction or serious injury to the sense of smell, hearing, sight and taste, we have a catalogue of horrors which would lead any person to make early and proper efforts to eradicate the disease from the system. Every case of Catarrh is curable if properly treated.

BRONCHITIS.

Acute Bronchitis is an inflammation of the mucous membrane of the bronchial tubes, and is one of the most common of the pulmonary diseases. It is a dangerous disease, as it prevents the oxygenation of the blood, and in many cases, particularly after it passes into the chronic stage, the substance of the lungs becomes seriously involved, giving rise to what is very properly called Bronchial Consumption. In the acute form there is a sense of tightness or pressure across the chest, with considerable wheezing, severe cough and expectoration. This is at first a white glary mucous, which after a time becomes purulent. The patient in some cases is obliged to sit up in bed, the oppression across the chest is so great; the skin is clammy and prostration rapidly sets in, and in fatal cases there will be muttering delirium, coma and death.

CHRONIC BRONCHITIS.

Chronic Bronchitis is also an inflammation of the mucous membranes of the bronchial tubes. When a cold settles on the lungs the disease either ends in bronchitis or pneumonia. If it ends in bronchitis it usually passes off as a cold on the chest, and still the patient does not feel entirely well. He feels tired and languid, and is incapable of taking his usual amount of exercise, and experiences a shortness of breath, with more or less warmth in the palms of his hands. Soon after this a cough appears, accompanied by an expectoration of thick mucus, followed by a hectic flush, loss of flesh and strength and night sweats continue, when the patient assumes all the appearance of having a genuine case of consumption. But this is simply catarrh of the lungs or chronic bronchitis.

In the later stage of the disease the mucous membrane of the larger bronchial tube softens, while in the smaller tubes and air cells of the lungs the mucous membrane becomes congested and inflamed. There are no cavities nor tubercles in the lungs, but merely a wasting away of the larger bronchial tubes, and death takes place from obstruction of the bronchial tubes and air cells of the lungs. The patient dies from exhaustion and suffocation, being unable to expectorate the mucous which accumulates in the passage leading to the lungs, which in some cases is sticky and small in quantity, but more commonly copious, of a light straw or yellowish green. Oftentimes streaks of blood make their appearance in the mucous, and at times there is a disagreeable smell. Persons thus afflicted are very liable to take a cold, at which time the mucous becomes clear and frothy, and it is not uncommonly the case that the patient dies in one of these attacks.

CONSUMPTION.

From consumers, "to waste away," usually applied to the advanced stage of lung disease.

The following are prominent symptoms in the first stage, and wherever any of them exist a thorough examination should be made with a view to arresting the disease if shown to exist: There is usually a sense of weariness upon a little exercise, a disposition to remain passive and idle, despondency, often from no apparent cause, a peculiar sensitiveness to the effect of cold, and a breathlessness on moving quickly or descending a hill or stairs, a slight hacking cough, with or without expectoration, exitability upon slight occasions, flying pains across the chest or back, or under the shoulder blades. The symptoms are more noticeable toward or during the night, slight fever in the afternoon, cold feet or hands, or in many cases blue lividity of the lips and roots of the finger nails.

Inhalations are applicable in all diseases of the respiratory organs, but must be prepared for each individual case as they severally require.

Persons desiring treatment by this system of practice can use the remedy at home as well as at our office, and which will cause no inconvenience or hindrance to business whatever.

I have seen so many of these cases cured that I do not consider any case hopeless unless both lungs are seriously involved. Even then the inhalations aid us in dissolving the mucus and in contracting and healing the cavities, which nothing else can do with the same success. The very best references from those already cured.

CONSULTATION FREE.—Those who desire to consult with me in regard to their cases had better call at the office for consultation and examination but, if impossible to do so, can write for a copy of my Medical Treatise, containing a list of questions. Address
